

3

years

1

network

5

partners

12

developments

There is a lot of consultation, common thinking and cooperation behind the numbers. It is difficult to summarize the work of 36 months in a few thoughts, but we are happy to do so, since many, many values have arisen from our cooperation, which would not have been possible without the support of the AT-HU Program.

3 years ago, we thought that the digital transformation could be accelerated by integrating the organizations that support it. Sticking to our vision, IMPROVE! as network members, we organized our daily work, held trainings, developed a joint service portfolio and launched a call for tenders for joint developments for SMEs. In line with this idea, instead of the planned 10, we implemented the digital development of 12 businesses and made our digital services available to hundreds of international and cross-border interested parties.

Meanwhile, in addition to Industry 4.0, we are increasingly talking about the appearance of Industry 5.0. In this way, human-centered, resilient and sustainable digitalization is integrated into our existing concepts.

And after 3 years, as a parent proudly looks at his child, we as IMPROVE! Network members stand now on the verge of project closure, and sigh: "How quickly these 3 years flew by!"

Enjoy reading and getting to know our cooperation!

Sincerely, IMPROVE!-ers
